

CRF wildflowers

Welcome to
Chapman River Regional Park !

INTRODUCTION

Welcome to CRFwildflowers app.
This app will help you to identify the wildflowers in the Chapman River Regional Park and across the Midwest Region in Western Australia.

Chapman River Regional Park is a natural bushland area of 364 ha, situated in the heart of the City of Greater Geraldton. The park is home to over 300 species of native plants, some of which are listed as Priority or Regionally Significant Species.

The Chapman River Regional Park is located within the Southwest Australia Biodiversity Hotspot which has been recognised as being one of 25 most important areas for biodiversity globally.

The most prolific flowering time within the Chapman River Regional Park is between the months of June and October.

The park is a refuge for native fauna. 123 recorded species of birds, both migratory and resident, 22 reptiles, 7 frogs, 2 turtles, and numerous fish species. Echidnas, bats, possums and kangaroos can also be found in the park.

This project is supported by the Northern Agricultural Catchments Council through funding from the Australian Government National Landcare Program.

ACKNOWLEDGEMENTS

Chapman River Friends acknowledges the Yamatji people who are the Traditional Owners of this country, and pays respect to their Elders past present and future.

This app has been possible through our community's energy and enthusiasm.

Special thanks to Jenna Brooker, Alice James and Ann Guinness for their local flora expertise.

Credit photos : Tony and Jenna Brooker - Beth Teale.

Design : Virginie Fuhrmann - Linda Howitt - Alice James.

Web design : Adrian DeWitt

How do you use this app?

This app provides additional identification information to support the CRF Wildflowers Brochure which can be found at the Visitor Center, Art Gallery and Geraldton Museum in Geraldton, WA.

Each plant has a *scientific name* in italics, sometimes a common name and a FAMILY name in capitals.

CRF wildflowers

Eremophila brevifolia
Spotted Eremophila
SCROPHULARIACEAE

or visit your native plant Garden Center.

BUSH WALKING BASICS

Chapman River Regional Park is a jewel right on our doorstep!

Paths are rough. Be prepared:

- wear appropriate bush clothes and shoes.
- use sun protection (i.e. hat and sunscreen).
- BYO water.
- stay on the trails for safety as we are in a natural area with natural hazards.
- it is illegal to remove any native flora and fauna.
Leave only footprints, take only photos.
- bring your magnifying glass to observe tiny things (insects, flora), binoculars to find birds in the trees and camera. Share your pictures with CRF.
- report illegal activity to the **Ranger: 99956 6600** OR use the app: **SnapSendSolve** OR email the City: council@cgg.wa.gov.au
- IN AN EMERGENCY: DIAL 000

REMEMBER - Your Safety: our concern your responsibility

Take your time - engage your senses - see, hear and smell the park and immerse in its tranquility. Stop and listen, look for birds, kangaroos, reptiles and above all re-connect with your inner soul.

Enjoy a bushwalk in town!

CHAPMAN RIVER FRIENDS-CRF
is a group of volunteers that promotes and
helps in the rehabilitation of Chapman
River Regional Park, Geraldton - WA.

Acacia ericifolia

FABACEAE

49

number in
brochure

small shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

One of the first Acacias to flower in the cooler seasons.

Acacia ericifolia

FABACEAE

Acacia idiomorpha

FABACEAE

50
number in
brochure

small shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

Recognise this low growing wattle by the shape of its leaves and abundant prickles.

Acacia idiomorpha

FABACEAE

Acacia rostellifera

Summer Scented Wattle

FABACEAE

13

number in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

**DID YOU KNOW ?**

This acacia can be a tree or a shrub. It is distinguished from other acacias by its long, flat leaves which have hooks on the end. The seed pods are like a string of beads.

Acacia rostellifera
Summer Scented Wattle
FABACEAE

Acacia saligna

Orange Wattle

FABACEAE

25

number in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

The 'leaves' of many wattles are actually modified leaf stems called phyllodes. This wattle has nectar in a 'nectary' at the base of the phyllode which attracts ants and the ants protect the wattle from leaf-eating insects.

Acacia saligna
Orange Wattle
FABACEAE

Acacia scirpifolia

FABACEAE

26

number in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

Acacia leaves are actually modified stems that function as leaves. The leaves on this species are cylindrical rather than flat.

Acacia scirpifolia

FABACEAE

Acacia spathulifolia

Spoon Leaf Wattle

FABACEAE

27

number in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

This acacia has a succulent (water holding) phyllode/leaf.

Acacia spathulifolia
Spoon Leaf Wattle
FABACEAE

Acanthocarpus preissii

Pickle Lily

ASPARAGACEAE

85
number in
brochure

small shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

Looks like couch grass but is more similar to the lily family.

Acanthocarpus preissii
Pickle Lily
ASPARAGACEAE

Allocasuarina campestris

Tamar

CASUARINACEAE

28

number in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

All species in this family have winged seeds. Casuarina seed is translucent and Allocasuarina seed is black. The female plants hold the cones and the male plants turn a rusty colour with pollen.

Allocasuarina campestris

Tamar

CASUARINACEAE

Alyogyne hakeifolia

Narrow Leaf Hibiscus

MALVACEAE

29
number in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

This species can be distinguished from *Alyogyne huegelii* by its narrow leaves.

Alyogyne hakeifolia

Narrow Leaf Hibiscus

MALVACEAE

Alyogyne huegelii

Lilac Hibiscus

MALVACEAE

30
number in

number in
brochure

climber

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

Interesting green yellow flowers which are quite inconspicuous.

Aphanopetalum clematideum

APHANOPETALACEAE

Astroloba serratifolium

Kondrung

ERICACEAE

52
number in
brochure

small shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

The flowers on this plant are long, red and tubular.

Astroloba serratifolium
Kondrung
ERICACEAE

Banksia attenuata

Slender Banksia

PROTEACEAE

not in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

This plant grows as a shrub in Chapman River Regional Park but as a tree in the southwest.

Banksia attenuata
Slender Banksia
PROTEACEAE

Banksia prionotes

Acorn Banksia

PROTEACEAE

14

number in
brochure

flowers in

JAN FEB MAR APR MAY

JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

Most banksia flowers are spikes. This is one of the few flowering plants in the park at this time of year and is a vital source of nectar for birds and insects.

Banksia prionotes

Acorn Banksia

PROTEACEAE

Banksia sessilis

Parrot Bush

PROTEACEAE

34
number in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

The species name 'sessilis' suggests this plant is ground hugging but it can be erect. This species was previously known as *Dryandra sessilis*.

Banksia sessilis
Parrot Bush
PROTEACEAE

Bonamia rosea

Felty Bell Flower
CONVOLVULACEAE

86
number in
brochure

herb

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

This plant suckers so it is often found in clusters. A 'herb' is defined as a non woody plant, the stems dying back to the ground at the end of a growing season.

Bonamia rosea
Felty Bell Flower
CONVOLVULACEAE

Boronia coerulescens

RUTACEAE

53

number in
brochure

small shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

Boronias have sweet smelling flowers, four petals and oil glands in their leaves making them strongly scented. sweet smelling flowers.

Boronia coerulescens

RUTACEAE

Borya sphaerocephala

Pincushions

BORYACEAE

87
number in
brochure

herb

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

This is a resurrection plant - it appears dead in summer and comes to life with the first rains!

Bossiaea spinescens

FABACEAE

54
number in
brochure

shrub

flower

flowers in

JAN FEB MAR APR MAY JUN JUL AUG SEP OCT NOV DEC

DID YOU KNOW ?

There are many yellow/red pea shaped flowers within the Chapman River Regional Park. This species can be distinguished by its relatively wide leaves and flat seed pods.

Bossiaea spinescens

FABACEAE

*Burchardia congesta*Milk Maids
COLCHICACEAE88
number in
